
The Opening of 2013 Principal Research & Training Class For State Security Training Agency Officially Confirmed in Shenzhen

March 26th, 2013-Shenzhen. The 2013 Principal Research & Training Class for State Security Training Agency, lasting for four days while, officially started in Shenzhen on March 26th, 2013. It was held by the State Administration of Production Safety Management General Office Training Center, belonging to the directly affiliated undertaking institution of Administration of Production Safety Supervision and Management General Office.

On the morning of that day , all representatives attended the opening ceremony on the 4th floor, Zone A, Civic Center of Shenzhen Municipal Government, with the participants that both Director Xu Hancan and vice-director Xiang Guisheng from State Administration of Production Safety Management General Office Training Center, Director Liu Cuixia from Business Development Department of State Administration of Production Safety Management General Office, Director Zhang Qingkuo from State Administration of Production Safety Management General Office Training Center, Director Xu Sanyuan from Guangdong Safety Production Technology Research Center, vice-director Ren Yangfeng of Shenzhen Safety Committee, as well as other principal representatives for Safety Training System departments at all levels nationwide. Herein, leadership representatives respectively delivered the speeches in the beginning of the opening, to be specific, Director Xu Hancan further propagandized the file called “ *No.10,2012 State Council Safety Committee: Decision on further strengthening safety training work*”,which revealed the major significance and requirements of realizing the importance safety production and safety training work.

In the afternoon, all the participated representatives went to visit Shenzhen Modern Safety Diorama Education Base, as more than 100 persons were divided into four groups to respectively

visit 17 safety exhibition halls, and then they took the elevators to the 7th floor, where the ISD command center was built by Anxin-China Holdings Limited, for watching the real-time demonstration. Herein, the related professional staffs from Anxin-China made an outstanding demonstration and detailed introduction about ISD and iVAS systems, as well as practical monitoring points distributed in major accesses, for those representatives from government departments at different levels. In truth, both ISD and iVAS systems used high technologies to change the traditional security means so as to realize the transformation of artificialization monitoring into complete an intelligent & automatic one. Thus, pre-alerting instead of post-processing could largely reduce the quantity of all kinds of safety accidents, and further improved the working efficiency of the government department altogether. After learning the presentation, all the representatives at varieties of training institutions became deeply interested in iVAS system as well as such a whole security platform , while some of them focused on the inquires that-what is the construction solutions and capital budget of this platform ? Or is the technology developed by Anxin-China? What are the successful cases for such an intelligent system? What about its system compatibility? And et al. Accordingly, Anxin-China staffs specifically answered all the questions with much patience and earnest, which left a way deep impression on all the principals from security supervision system training institutions at all levels.
