

## Anxin-China Attended Hubei Safety Production Technology Working Conference on Invitation

The conference site.

(Hubei-Nov. 29th, 2013) Hubei safety production technology working conference was successfully held on this morning. The participants included related major leaders from all municipal Administrations of Work Safety and principals of safety production technology demonstration project units. Also, Anxin-China attended this conference as the renowned demonstration units of safety production technology companies.

During the conference, leaders from Hubei Province Administration of Work Safety respectively discussed the contents of Technology Department of State Administration of Work Safety: *Notice on strengthening the supports for safety production technologies*, and State Administration of Work Safety, *Notice on strengthening the innovation for safety production technologies*, *Decision on strengthening the safety production technological innovation*, and *Hubei Administration of Work Safety: notice on honoring the Hubei safety production technology demonstration unit*, and then further revealed the importance and urgency of developing safety production technologies . At the same time, they proposed higher demands for the technological innovation in safety production.

After that, the leaders called upon all units to learn from the rich practical experience of demonstration project units , and stated that it' s required to largely promote the applications of new advanced technologies, techniques, equipments and materials in the safety production area. They spoke highly of Yingcheng safety production emergency rescue command center which was due to Anxin-China' s technological innovation. In the Q&A stage, the participated leaders visited Anxin-China' s exhibition stand to consult issues about Anxin-China' s ISD system, and some of them said they intended to

visit Anxin-China ' s ISD project bases as soon as possible for the upcoming cooperation.🔴
