

iVAS System Promises Residents' Power Utilization Safe

(Xuzhou-May 16th)Mr. Wong, an ordinary citizen in Jiangsu Province, told journalist that the transformers deployed in the turn-water stations and some factories have been often been stolen recently, which drew high attention of Pei County Police Station. Pei County Police Station made an official statement on May 16th that this case had been worked out while the theft team was involved in 6 theft cases with the claim amount at 60 thousand RMB.

Anyway, this kind of theft action is shameful and illegal, which creates a terrible social morality disturbing common residents' daily life. Then, what's the best means to prevent this behavior and improve the whole public security issue? Herein, Anxin-China reveals the iVAS system to work out this problem.

Anxin-China iVAS is an intelligent advanced system under the claims of state policies, aiming at realizing the real-time pre-alert surveillance and timely collecting monitoring data to provide scientific management policies for security surveillance departments at all levels. In fact, here is another piece of news that some criminals enters into a power supply station to steal electric wires at midnight while the security personnel sleep without any precaution, finally making a mass of losses uncountable; then, the officers and leaders decide to use Anxin-China iVAS to monitor those major alert areas, because it could immediately inform some security personnel to deal with related matters while people linger and stay in the alert areas; moreover, this system can also actively recognize the suspected persons effectively in all management areas.

Therefore, it's so important to guarantee the city's security, which is an indispensable part of modern society firmly connected to the citizens' sense of happiness and belongings. Anxin-China iVAS system relies on its top-level monitoring technology to accompany relevant government departments to implement effective surveillance and management, and gets devotion to bring out a better life quality through provide common citizens with a much safe society.
