

ANXIN-CHINA Attained the Qualification of CMMI Level 3

June 26th, 2011. Shenzhen City. ANXIN-CHINA successfully reached the CMMI level 3 standards after the CMMI level 3 identification report conference was held in the ANXIN-CHINA conference room. Specifically, CMMI is the standards evaluating the quality and management of software products, which was set by the American Engineering Institute. Herein, CMMI refers to Capability maturity model integration. Chairman Liu appreciated such a result of the strict identification process, and believed that ANXIN-CHINA would make constant progress in technological innovation and daily management.
