

Leaders from Shenzhen Municipal Committee United Front Department and Association of Industry and Ecommerce Visited Anxin-China for Investigation

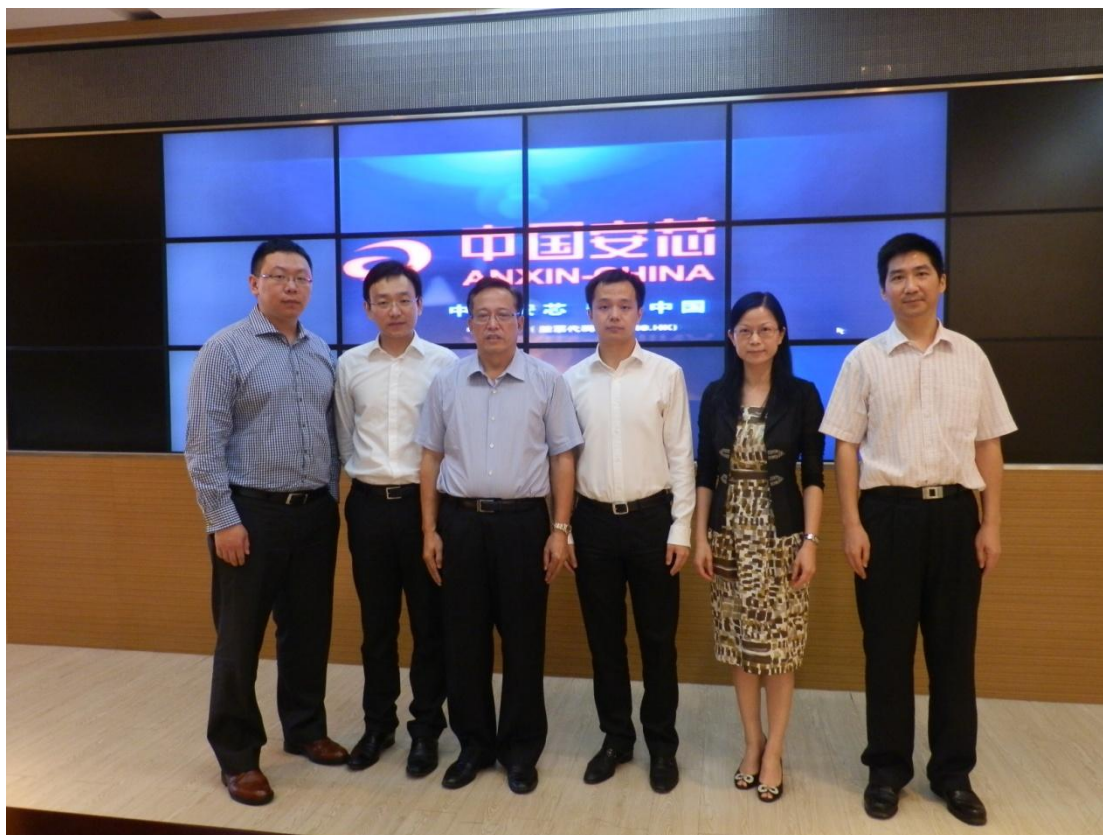

On July 4th, 2013, Zhang Siping, the me Shenzhen Municipal Committee United Front Department and Association of Industry and Ecommerce mber of Shenzhen municipal committee Standing committee, leads the other leaders from, to visit Anxin-China for further investigation. Accordingly, M. Liu Zhongkui, M. Lin Supeng and M. Li He, who were the senior executives of Anxin-China, warmly welcomed the group of government leaders, and then held an investigation conversation in Anxin-China's Shenzhen Headquarter.

In the process of investigation and survey, M. Liu Zhongkui, the CEO of Anxin-China, introduced Anxin-China's development status to those government leaders. Specifically, Anxin-China Holdings Limited (Anxin-China), with market value over 5 billion HKD as of 31 December 2012, is a public company listed in the Hong Kong Stock Exchange (HKEX). Being a leading industrial and public safety integrated solution provider & operator in China, Anxin-China always devotes itself to providing intelligent security systems for both public security and industrial safety production areas. M. Liu also added that the corporate business has expanded from the safety security area into the public security area, or in another saying, its major security surveillance system product line also covers the ISS system, including ISD, iVAS, ITS and et al. However, both M. Li and M. Liu accurately the key points of Anxin-China's intelligent security systems and hardware equipments, as well as the practical applications and advantages of iVAS in the public security area.

Thus, after hearing the details and prospects about Anxin-China, those leaders coming from Shenzhen Municipal Department became very interested of Anxin-China's numerous products. They stated that they were very glad to see such a great corporation made so many contributions to smart security areas, which were highly worthy of all participants' appreciation. In addition, all

of them hoped that Anxin-China would constantly develop its advanced products and technologies, to expand its advantageous entities to promote the construction of smart city and safe city.

Moreover, considering the company's business development cannot be fulfilled in Anxin-China's Shenzhen Headquarter, Anxin-China has transferred its major business into its subsidiaries in other cities while the new headquarter base building is in the predicted output. Anyway, this strategy aims at properly presenting its technical advantages to promote the business expansion. Presently, Anxin-China had proposed some materials to the municipal committee for investigation procedure, or it could be said that Anxin-China needed the supports of Shenzhen municipal committee. Herein, those leaders acknowledged the problems and then immediate proclaimed that, those issues would be solved as soon as possible under the assistance of Shenzhen Municipal Government, so that Anxin-China made a concentration on the security surveillance business area bringing more benefits for the whole society. Therewith, Anxin-China accepted this great mission with pleasure.
