(Shenzhen-Oct.24th, 2013)Tang Daolun, the deputy mayor of Huai' an City, Wang Sujun, the Municipal Deputy Secretary General, and et al. visited Anxin-China for guidance and survey. Huai' an municipal government is Anxin-China' s long-term

strategic partner. Both of them have made further cooperation in multiple areas, including civic defense and ISD system. Such a visit of the investigation team revealed that Huai' an municipal government affirmed the previous mutual cooperation and intended to implement another discussion on the following strategies.

During the conference, Mr. Liu Zhongkui the chairman of Anxin-China board of directors thanked Huai' an municipal government for their supports and help, and then talked with those leaders about the plan of "safe industrial park in smart city" . Anxin-China wanted to cooperate with Huai' an city to build a collection site and demonstration center for China' s security products. Moreover, such an industrial park still had the function of security education. Accordingly, M. Tang approved of the necessity of constructing this industrial park to popularize the social security common sense to the local public, which could promise the safety of people' s lives and financial properties to a certain extent.

However, both sides believed that the plan of "safe industrial park in smart city" , under the great cooperation relationship between Anxin-China and Huai' an city, could be realized as soon as possible to make contributions to China' s security business.
