

## **The 14<sup>th</sup> China High-tech Exhibition Highlights iVAS System**

On the morning of November 16<sup>th</sup>, 2012, in Shenzhen City, the 14<sup>th</sup> China High-tech Exhibition was successfully held in Shenzhen Exhibition Center. Herein, ANXIN-CHINA participated in this exhibition with several high-tech products, especially including the iVAS system cooperatively developed by both ANXIN-CHINA Holdings Co, Ltd and Israeli Mate company.

During the meeting, Liu Zhongkui, the CEO and chairman of ANXIN-CHINA, made a detailed introduction to ANXIN-CHINA products' features and application fields for Du Ying, the vice-chairman of National Development and Reform Commission, who also spoke highly of iVAS and thanked the contribution that ANXIN-CHINA made to China's security industry. Furthermore, many clients would like to build business cooperation with ANXIN-CHINA because of its powerful influence and public praise in the security industry. In fact, iVAS system has a lot of practical smart features completely compatible with various network elements. Presently, iVAS system has been applied in a lot of major parking lots and particular roads, also with the successful experience in the main Bird's nest venue for the 2008 Beijing Olympics, baggage screening systems in the Beijing Capital International Airport, multiple road crossing around the Beijing Oil Building, Jinan Minsheng Banking Corp . Ltd, located in Shandong and etc.
