

## **Anxin-China ISD Makes “Safety Production is First” Come True**

**Source from cps.com.** Presently, Guangdong Safety production committee has just released the emergency file that *notice on further strengthening the fire protection work due to the recent fire hazards*. At 5:10 a.m. in May, 6<sup>th</sup>, a fire accident occasionally occurred in Longquan District, Humen Town, Dongguan City, with fire resident area at about 200 square meters, totally 8 deaths and 3 injuries. At 5:26 a.m. in May, 24<sup>th</sup>, one automobile maintenance center met with a fire hazard in Nanhai District, Foshan City, with fire resident area at about 96 square meters and totally 9 deaths.

Anyway, those abrupt disasters bring us with pains while indicating the vulnerable spots in the corporate security surveillance aspect. In fact, it's never enough for the government leaders just to arrange some groups to realize fire protection inspection, which cannot prevent the subsequent fire attacks. Accordingly, the best solution is that both corporations and government security surveillance departments need to possess the common acknowledgement concerning the fire protection safety production. Herein, Anxin-China ISD system has made a great contribution to this effective means, with realizing the acquaintance that “safety production is first”.

However, Anxin-China ISD system, combining the outstanding hardware equipments with software management application into a perfect integration, can keep monitoring the key units in real-time, whose emergency rescue information sharing function could help command personnel to collect key dangerous elements so as to prevent the disaster and dangerous cases with high efficiency, through providing smart alerting, fast solution, integrated management and professional service.
