

## **The Crystal: iVAS System with Automatic Warning Function**

November, 19th, Shenzhen. According to a report from *the Crystal*, a well-known journal in Shenzhen City, that:

*Presently, the international top smart video analysis technology, called the iVAS system, has just been launched in the China high-tech Exhibition Center, Shenzhen. iVAS system supports the automatic warning function, which is cooperatively invented by both ANXIN-CHINA Holdings Co, Ltd and Israeli Mate company. Now this technology available in Shenzhen means that China's is expected to upgrade from the traditional video monitoring to the presently advanced smart video surveillance.*
