

## **ANXIN-CHINA Went to Pengshui Administration of Work Safety to Execute the Security Product Promotion**

July 9<sup>th</sup>, 2012. Pengshui county, Chongqing. Xiao Jiankang as the director of Chongqing administration of Work safety and Liu Qiang as the vice-director of industry development office led ANXIN-CHINA staffs to execute the safety production emergency rescue system construction projects through cooperation with Pengshui county Administration of Work safety.

During the meeting, Director Xiao firstly introduced ANXIN-CHINA of basic information, major products and their features. As the present Pengshui public emergency rescue surveillance system was imperfect, ANXIN-CHINA could also make a large contribution to local security development through its security system promotion and construction. The government leaders also stated that Pengshui county would try hard to cooperate with ANXIN-CHINA to bring the public safety conditions into a much more secure level, with forming a mature security monitoring platform covering four areas including city, county, country and corporation. It also means ANXIN-CHINA gets another progress while promoting security product construction in Chongqing.
