

## Anxin-China Attended the 2<sup>nd</sup> Shenzhen Smart Traffic Auditorium on Invitation

M. Li Xia, the vice-president of Shenzhen Smart Traffic Industrial Association, host the forum

(Shenzhen-Aug. 23th, 2013) To popularize the smart traffic knowledge among the residents, the 2<sup>nd</sup> Shenzhen Smart Traffic Auditorium was successfully held in Shenzhen civic center industrial exhibition hall. This is a public interest forum activity created by

Shenzhen smart traffic industrial Association under the guidance of Shenzhen municipal party committee, whose aim is to popularize the common smart traffic knowledge, improve the technological communication innovation, and promote the industrial constant development. As a result, it attracts various smart corporations, industrial news media, academic institutions and etc, through highlighting hot topics and new forms. Also, residents and industry insiders spoke highly of the final forum achievement.

M. Jia Lieke, the chief of Shenzhen municipal emergency management office publicity and training division, made the opening speech.

Thus, Anxin-China attended this activity on invitation. The theme being defined as

"smart technologies ensure trips safe" , Ms. Cai Mao, the assistant president of Anxin-China, presented a lecture about the development conditions of smart city and traffic, the applications of iVAS in traffic area, intelligent vehicle management as well as the successful cases of iVAS, and made a sincere, interactive communication with the audience. Here, this activity with a rather high atmosphere was well received by governmental leaders and industrial specialists. 🔄

Ms Cai Mao presented the lecture on the applications of smart video in traffic management.

The audience participated in the hot topic discussion.
