

## **Anxin-China Always Focuses on Solutions Preventing Water and Fire Hazards**

According to the news from Heilongjiang Hailun Municipal Government Website, a fire accident happened in Hailun United Nursing Home at 1:15 a.m, 26<sup>th</sup>, July, 2013. Within five minutes after the fire hazard, the municipal fire brigade arrived at the accident site to make the rescue work, as a result, 10 residents dead even if the fire was wiped out ultimately.

We always know the truth that water and fire have no mercy, while there is almost no more effective way for us to prevent the fire hazard. Herein, Anxin-China takes its responsibility to focus on developing all available means to prevent the occurrence of disasters. To be specific, after purchasing the video analysis technology from Israel Mate Company, Anxin-China has begun to develop the applications of iVAS system in preventing fire and water hazards. On one hand, this system can effectively monitor the data which is transmitted from smog /temperature sensor deployed in all corporation or sites, while the abnormal situation simulates the system alarm subtly. On the other hand, the iVAS system can keep monitoring all fire protection equipments and escape routes , to help people escape away quickly at the moment of fire hazard.

Indeed, Anxin-China has released a series of industry analysis on fire hazard, aiming at applying advanced computing technology to realize the precaution goal. Anyway, Anxin-China is always striving for the super objective of constructing smart, safe cities. Your safety is always Anxin-China's business!
