

The Investigation Group from Guizhou Nayong County Government Visited Anxin-China' ISD Project Base in Shenlongjia, Hubei

During August 3th to 5th, 2013, the investigation group consisting of the dupty county chief Luo Xiaojun and other five senoir leaders visited Anxin-China' s ISD project base in Shenlongjia. They acknowledged the specific functions and applications of Anxin-China' s ISD system in coal mining surveillance areas. Accordingly, leaders from Anxin-China, including Peng Xuanlai, the general manager of Anxin-China marketing center, accompanied the leaders to visit the project base.

The investigation group, including M. Luo the County Chief of Guizhou Nayong County carefully learned about local software engineer' s introduction in Anxin-China' s coal mining surveillance system command center in Shenlongjia. Then, they took a deep discussion on such a surveillance system' s functional features, practical applications and typical case analyses. Besides, M. Luo spoke highly of this system and stated that it could be greatly beneficial to promote Anxin-China' s ISD system in Nayong County coal mining safety surveillance area, and thus it is supposed to play a role of security guarantee.
