

## **Anxin-China Strives for the Construction of Smart and Safe Cities**

It is very common about the news that children are attacked by dogs. Several days ago, Xiao Xue, a four-year-old girl, stayed alone at home and was seriously bitten by an Akita. In fact, the dog had tried to attack others without signs before that case.

Xiao Xue lives in a broken family, currently being raised by his father, Mr. Chen. He always loves dogs very much. He has ever kept four dogs at the same time, and two of them are wolf dogs with kind temperament doing no harm to the family. The Akita “ahu” was purchased by Mr. Chen in this February.

On that afternoon of animal attack case, Xiao Xue was left in the house with the Akita dog by Mr Chen, who needed to go to Shenzhen and asked for his brother Xiao Chen to take care of Xiao Xue. And then Xiao Chen left the house for an hour. As he returned back, it was terribly seen that this dog has fresh blood in its fur.

Xiao Chen entered the room and found the young girl was wholly covered with blood. She just quietly stood beside the wardrobe. Her left ear and right-up leg arm were seriously bitten, and the back side of head was even bitten with a hole. Seeing this, Mr. Chen immediately took the girl to the nearby hospital. On that night, Xiao Xue was transferred to the municipal-A hospital to have an operation.

The doctor said, “ It is required to observe Xiao Xue for a week to confirm whether she has been injected by the virus. If it is, her life will be largely threatened.”

In this year, the safety issues of children have caused general discussions in the public. However, any kind of animal attack cases would make us worry about the lovely children so much. So, is

there any solution protecting our children from all aspects? Accordingly, Anxin-China always thinks that the smart city is required to promise each child away from the dangerous circumstance firstly. Thus, such a smart and safe city could make much convenience to the residents, so that they can totally enjoy the benefits of technologies. In addition, someone would like ask: what are the key technologies to realize the smart city? How can those technologies change our daily life?

Anxin-China introduced the advanced international intelligent video analysis technology from an Israel company with an aim at building a key role in the construction of smart cities. Specifically, Anxin-China' s iVAS system can effectively monitor the target areas and find out the issues timely, which largely strengthens the urban governance and saves the workloads of surveillance personnel.

Anxin-China always spares no effort to stick to teh construction of smart and safe cities.
