sznews.com: the Global advanced Intelligent Video Analysis Technology Launched in High-tech Exhibition Center, Shenzhen

On the afternoon of November, 18th, Shenzhen. iVAS system, as an international top smart video analysis technology, was launched in China High-tech Exhibition Center, Shenzhen. iVAS supports the automatic warning function, which is cooperatively invented by both ANXIN-CHINA Holdings Co, Ltd and Israeli Mate company. Now, this technology available in Shenzhen means that China is expected to upgrade from the traditional video monitoring to the presently advanced smart video surveillance.

ANXIN-CHINA Holding Co, Ltd introduced that this new technology can make adequate analysis towards the video pictures, and then provides quick response to relevant surveillance staffs. Specifically, compared to the traditional smart video monitoring technology, iVAS system consists of a lot of advantages including full-day monitoring, higher response speed, more application fields and etc. Moreover, this system has been practically applied in jail, museum, cultural places, traffic tracks & roads, industrial facilities and etc.
